

Overall fit: GP and the true formula coincide ($R^2 \approx 1$)

GENETIC PROGRAMMING BASELINE — wrong structure

```
sqrt(add(div(X0, -0.676), div(X0, -0.600)))
```

Zoomed scale: GP carries a nonzero structural offset

CANONICALSR — canonical, exact structure

```
sqrt(pi)*sqrt(a)
```

Zoomed scale: CanonicalSR residual is zero
